DRAWERS & DOORS

ONLY FROM C-TECH
MotionLatch™
Drawer & Door System
US Patent 6,547,289

The clean, contemporary styling of CTECH designs are as good as their performance.

CTECH's unique patented latching system gives you peace of mind during transport.

CTECH's unique manufacturing ability allows you flexibility in your cabinet system.

- Automatically latches when closed.
- Easily opens with just ONE FINGER!
(Even wearing gloves and carrying tools)
- Won't accidentally open during transport.
- Unlatches by pulling anywhere along entire handle.
(no unlatch button)

**“One Hand -
One Motion”**

- **Longevity** - Allows expansion and contraction of countertop to prevent warping.

- **Safety** - No sharp edges.

- **Style** - Two piece innovative backsplash aids in the installation and conceals fastening hardware.

- **Leak Resistant** - Sealed countertop area helps stop spilled liquids from draining into cabinet interior.

- **Easy Installation** - Eliminates the need for screws and messy caulk.

- **CTECH Touch** - Injection-molded corners complete the look, providing an attractive, functional countertop.

GasketLoc™
CounterTop System

DRAWER INSERTS

CTECH Drawers "One Hand - One Motion"

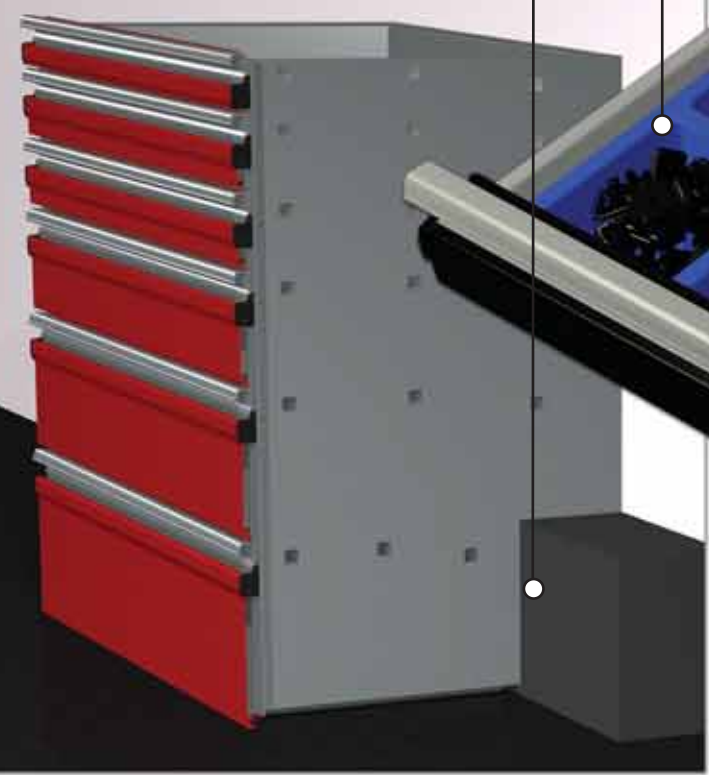

- Half the weight of a comparable steel drawer
- Automatically latches when you shut it
- Open with just ONE FINGER! Even wearing gloves and carrying tools
- Won't pop open during transport
- Unlatch by pulling anywhere along entire handle (no unlatch button).
- Built RUGGED for every racer's need

The MotionLatch™ drawers can be designed to fit most existing cabinets. Our modular design allows you to slide your new drawer unit into the existing opening in your cabinet or cart.

Standard Opening Configurations

"My trailer cabinets are the last thing when I go

Ken Schrader has easy access to spare transmission and rear-end storage with a modified-standard door above the left wheel well.

CTECH engineers maximized Kenny's total work surface by incorporating one of our pit carts into the standard base units.

*I worry about
to the track..."*

"CTECH has always given me top performance and great looks. Their *MotionLatch™* Drawers and Cabinets are by far the best value on the market."

"...but they are the first thing I think of when I outfit a new Trailer or Pit Cart!"

"The bottom line is this... They listen, have practical solutions and often have new ideas for me to consider when I'm outfitting my trailers. They know cabinets, they know racing, and they know how to help our crew get the job done. I highly recommend CTECH Aluminum Trailer Cabinets, their staff, and the innovative manner in which they address my needs."

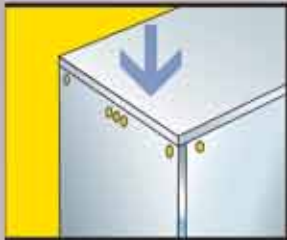

Ken Schraden

CTECH Aluminum Trailer Cabinets was founded in 1993 by Jim Greenheck.

Jim, a racer himself, spent a great deal of time traveling to and from events preparing his car, and experiencing all of the challenges every racer encounters. He recognized the dynamic nature of trailers and realized an opportunity to improve on the existing products through innovative design.

Due to Jim's extensive engineering and manufacturing experience the **MotionLatch™** Drawer and Door systems, **GasketLoc™** Counter Top System and other revolutionary designs were born and patented.

Those innovative initial designs allow CTECH to

work with customers closely, creating cabinet systems and pit carts that fulfill their needs ... and exceed expectations. Unlike traditional manufacturers, CTECH uses creativity in the development and fabrication process to produce what our customers' want, when they want it.

This catalog shows many cabinet variations and accessories that are available to you. We hope you find it helpful in determining your cabinet needs. For questions about specific applications, give us a call and put the CTECH team to work for you. You'll be happy you did.

Best wishes for a successful season.
