- The most efficient media/pit cart on the market

Presenting: The Next Generation Of Pit Carts From CTECH...

Newly designed and engineered, the "Ultra" has been in development for over two years. At CTECH, it's always worth the effort because of the final result...satisfied customers. Race teams looking for a competitive edge are the reason we continually strive to improve concepts, provide the best looking, most efficient, quality built carts and cabinets available anywhere. We hope you enjoy the "Ultra".

Ultra Media Deck™
This highly engineered upper platform features CTECH's exclusive **Ultra Media Deck™**. The Ultra Deck offers racers a fast, efficient set up for data acquisitions, monitors, as well as providing additional media seating.

Zero Scrub Steering Design
This exciting new design makes steering and motion effortless. Combined with 4-wheel Ackerman steering, and Urethane run flat tires, the "Ultra" moves easily on Custom billet wheels.

Chassis Platform
The entire monocoque frame is built of aluminum with steel only used for supports and spindles. This chassis design is extremely strong, offering tremendous weight savings and rigidity for heavier loads.

Pull & Stow™ Handle
The pull handle's unique design placement minimizes the effort of pulling the cart, as all the energy is directed forward, not upward. Add the unique **Pull & Stow™** handle design, and you've created another clean panel for branding or advertising for sponsors.

- A** Four wheel steering with pull & stow retractable handles.
- B** Auto leveling & Billet Aluminum Wheel with polyurethane tires.
 - Featuring the industry's heaviest payload.
 - Recessed self leveling stabilizers – on present sheet.
 - Add these custom billet aluminum wheels were designed to carry heavy loads and incorporate solid urethane as the tire in a low profile design ensuring a long, trouble free life.
- C** Sixty inch storage drawer.
 - The largest storage drawer in the industry gives race teams the option to store cumbersome or awkward tools, such as air hoses or extended pit poles.
- D** 2 self storing crew chief ladders.
 - Increased accessibility for both ends of the cart and self storing design decreases handling and storage issues as well as set-up and tear down time.
- E** 2 adjustable pit pole / camera pole mounts.
 - Fully adjustable camera and pit pole mounts allow for a variety of vertical settings for various combinations of pit poles.
- F** Complete utility panel including nitrogen regulators, ship-to-shore power, VGA & CAD outlets.
 - Connectivity if paramount.
 - The recessed panels can be designed to offer a variety of electrical and mechanical fixtures to meet the race teams needs.
- G** Swing-up monitor doors
 - Efficient flush mounted monitor doors offer exceptional visibility for a variety of brands and at the same time offer convenient storage space for other items.
- H** Two 6-drawer MotionLatch™ drawer inserts plus four chassis storage doors.
 - Optional drawer sets include choice of drawer sizes.
 - The lower chassis doors allow for a variety of storage options.
- I** Heavy duty hydraulically operated rear media deck plus flush lighting.
- J** Adjustable media deck ladder.
- K** Completely self contained with seats & monitor tower retracted for easy storage & transport.
- L** Media ladder & all seating neatly stored and contained within the cart.
- M** Enclosed slide-out generator draw with venting. Slide-out mount for 42" flat screen monitor and aerosol can slide-out drawer.
- N** Completely self contained rotating seats ergonomically designed for comfort and efficiency.
